

DVC COMPLETE COMMANDS CHECKLIST

1. Initialize DVC

```
dvc init
```

```
git add .dvc .dvcignore
```

```
git commit -m "Initialize DVC"
```

2. Track Dataset

```
dvc add data.csv
```

```
git add data.csv.dvc .gitignore
```

```
git commit -m "Track dataset"
```

3. Add Remote Storage

```
dvc remote add -d myremote
```

```
git add .dvc/config
```

```
git commit -m "Add remote storage"
```

4. Push Data

```
dvc push
```

5. Pull Data

```
dvc pull
```

6. Check Status

```
dvc status
```

7. Compare Versions

```
dvc diff
```

8. Remove Dataset Tracking

```
dvc remove data.csv.dvc
```

9. Create Pipeline Stage

```
dvc stage add -n preprocess -d preprocess.py -d data.csv -o clean.csv python preprocess.py
```

10. Run Pipeline

```
dvc repro
```

11. Visualize Pipeline

```
dvc dag
```

12. Track Model

```
dvc add model.pkl
```

```
git add model.pkl.dvc
```

```
git commit -m "Track model"
```

```
dvc push
```

13. Metrics Tracking

```
dvc metrics show
```

```
dvc metrics diff
```

14. Parameters Tracking

Create params.yaml

```
dvc params diff
```

15. Run Experiments

```
dvc exp run
```

```
dvc exp show
```

```
dvc exp diff
```

```
dvc exp apply
```

```
dvc exp remove
```

16. Reproduce Specific Stage

```
dvc repro
```

17. Import Dataset from Repo

```
dvc import path/to/file
```

18. Import Dataset from URL

```
dvc import-url
```

19. Garbage Collection

```
dvc gc
```

```
dvc gc -f
```

20. Safe Workflow Order

```
dvc add dataset.csv
```

```
git add dataset.csv.dvc
```

```
git commit -m "Track dataset"
```

```
dvc push
```

```
git push
```
